MS PROJECT® 2013

Intermediate/Advanced

Microsoft® Project is one of the world's most popular project management software applications. This course will build on the topics covered in the basic course.

- Quick overview of topics covered in the basic course;
- Create a resource list including people, equipment, material and cost resources;
- Create calendars for your resources;
- Learn about different task types and how this affects resource allocation;
- Allocate resources to tasks;
- Review your project to find over-allocated resources using various tools and views;
- Learn how to resolve these over-allocations;
- Create a Project Budget and view how costing is done;
- Create the initial baseline for your project and learn how to add additional baselines as required;
- Track the progress on your project using various methods;
- Report on progress using built in views and reports;
- Create a project template;
- Export your project data to Excel and print your project plan as a PDF.
