Microsoft® Project 2013 basic

Microsoft® Project is one of the world's most popular project management software applications. This course introduces you to the primary functions, features, tools and techniques of this dynamic and value-adding application.

- Introduction to the various components that make up the software package;
- Build a basic list of tasks grouped under summary tasks;
- Create a project calendar with working hours relevant to your organisation;
- Add public holidays and any company closure times to the project calendar;
- Create this calendar as a default for all projects;
- Link the tasks in your task list in the order in which they are going to be done;
- Learn about task relationships and task dependencies;
- Format your Gantt chart;
- Format your task list;
- Format the various views you use;
- Review the standard reports provided in MS Project.
