Contract Management

It's not enough to just deliver the project to the plans and specifications. You've committed to a contract and you need to understand your obligations.

Lack of knowledge and understanding of building contracts is the cause of numerous unprofitable building projects. The contract provides the basis for the scope of work, getting paid, managing time and quality issues, documenting project management and resolving disputes.

You need to work through the contract as you work through the job. Do you know how to do that?

This course is a must for builders, sub-contractors, suppliers, contract managers and administrators.

This one-day course is an overview of every area of contract management for those who need to know a little about everything.

- Contract formation and interpretation
- The claims process
- Variations, EoT's and delay costs
- Management teams
- Dispute resolution

Standard contracts are used in the workshop but participants are encouraged to bring contracts they currently use and are familiar with.
