Stress & Well-being management

This course looks at the requirements of water-proofing of wet areas in residential buildings. Common problem areas encountered by builders in the installation of water-proofing will also be discussed.

At this powerful half-day workshop, you will learn simple strategies and techniques that you can apply to lessen stress and improve well-being.

- ❖ What creates stress and tension
- ❖ How to tame your thoughts and manage your emotions
- ❖ How to take control of your life and stop over-committing yourself
- ❖ How to release tension in an instant
- ❖ How to use focus and self-discipline to overcome overwhelm
- ❖ Six simple well-being strategies to manage stress

Most of us aren't prepared to admit that we're not coping. We feel like we're supposed to have a handle on all of the pressures in our lives. We feel like it would be a weakness to own up to feeling overwhelmed.

Acknowledging your feelings (and your "humanness") is not only the first step in dealing with stress, it's also displaying a strength and courage that many people shy away from.

Using interactive, experiential exercises and real-life case studies throughout the program, you'll walk away with your own well-being plan and some proven techniques for lowering stress and reducing your sense of overwhelm.

Did you know that 95% of people suffer from stress and overwhelm?
