EXCELLENCE IN
CONSTRUCTION
AWARDS

Projects nominated for the safety award must be under construction at time of nomination and not completed prior to site audits/inspections, where the project is a finalist.

The purpose of the Award is to promote best practice OSH on building and construction projects through the acknowledgement and celebration of Excellence in Health and Safety.

ENTRY CRITERIA

General Entry Requirements:

1. Commitment to implementing and achieving high standards of occupational safety and health management.
2. An approach to occupational safety and health which incorporates identification and assessment of workplace hazards.
3. Workplace safety systems which incorporate recognition of employee training needs, intent to adopt higher order control solutions and ongoing monitoring and review.

IMPLEMENTATION AND MAINTENANCE OF OSH SYSTEMS:

Provide details on the company's commitment to implementing and achieving high standards of occupational safety and health management.

Examples could include:

- A list of components of your OSH management system (e.g. manual, policies, procedures, documentation).
- Future goals of the company.

HAZARD IDENTIFICATION, RISK ASSESSMENT AND CONTROL:

Provide details on the company's policy and procedures for identification, assessment and control of workplace hazards.

Examples could include:

- Method used to identify hazards (e.g. regular site/ workplace inspections, checking existing incident records and workers' compensation claims, incident reporting and/ or investigation, hazard/ near-miss alert reporting, OSH management systems audit, standard operating procedure reviews, consultation with employees).
- Procedure used to assess risks (e.g. classification matrix).
- Prioritisation of hazards (e.g. likelihood to cause injury or damage, probability of occurrence and potential to develop further).
- Methods used to control hazards (e.g. hierarchy of controls).
- Hazard reporting procedure.

PERFORMANCE

Provide details of the measurable improvement in the company's work health and safety performance and if the time and effort spent on improving health and safety in the workplace brought any benefits.

Examples could include reduction in:

- Workplace injuries/ incidents.
- Lost productivity.
- WorkCover / Insurance premiums and / or legal costs.

SAFE WORK AND OPERATING PROCEDURES:

Provide details on the company's safe work systems which incorporate recognition of employee training needs, a commitment to adopting control solutions where possible and ongoing monitoring and reviews.

Examples could include:

- Development and implementation of site specific safety instructions.
- Development and implementation of safe work method statements.
- Development and implementation of standard operating procedures.
- Company rules.
- Provision of personal protective equipment.
- Method for ensuring compliance with safe systems of work.
- Provision of information, instruction and supervision.
- Training provided to employees and maintenance of training records

Executive Summary– Address all items relevant to the Project

IMPLEMENTATION AND MAINTENANCE OF OSH SYSTEMS:

Provide details on the company's commitment to implementing and achieving high standards of occupational safety and health management.

Examples could include:

- A list of components of your WHS management system/processes (e.g. manual, policies, procedures, documentation).
- Future goals of the company.

HAZARD IDENTIFICATION, RISK ASSESSMENT AND CONTROL:

Provide details on the company's policy and procedures for identification, assessment and control of workplace hazards.

Examples could include:

- Method used to identify hazards (e.g. regular site/ workplace inspections, checking existing incident records and workers' compensation claims, incident reporting and/ or investigation, hazard/ near-miss alert reporting, OSH management systems audit, standard operating procedure reviews, consultation with employees).
- Procedure used to assess risks (e.g. classification matrix).
- Prioritisation of hazards (e.g. likelihood to cause injury or damage, probability of occurrence and potential to develop further).
- Methods used to control hazards (e.g. hierarchy of controls).
- Hazard reporting procedure.
