Bring Out Your Best for the Kimberley/Pilbara Building Excellence Awards

Master Builders is calling on talented trades, apprentices and, of course, builders to showcase their best projects from the past year in the upcoming 2018 Master Builders-Bankwest Building Excellence Awards for the Kimberley/Pilbara region.

All buildings entered in these prestigious awards will be judged solely on the criteria of workmanship and construction excellence. This includes such things as the quality of brickwork, plastering, cabinets, painting, window fittings, tiling and the like. All builders are eligible to enter.

The judges, who are all registered builders, evaluate each entrant on its structural merits. Design, décor or street appeal don't factor into their decision making.

Regional Branch Manager Dianne Gilleland said builders who consistently win awards from our Association have good reason to be proud and to showcase their reputation within the industry.

"We are extremely fortunate that there are so many good builders to choose from in regional WA, each specialising in different segments of the housing or commercial market," Mrs Gilleland said.

"We also seek to promote the specialist skills of tradespersons by presenting sponsored awards for categories such as bricklaying, plastering, timber, plumbing, painting, concrete and tiling. These individual awards recognise that any successful building project is the culmination of a strong team effort. Master Builders applauds the quality of workmanship and pride in the job demonstrated by all members of the building team."

Like Master Builders, each of the sponsors are stakeholders in the building industry and are proud to be associated with building excellence.

Entries are now open and will close on 2 February. Visit www.mbawa.com/awards/ to enter. The awards will be announced in Broome on 16 June.
